Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following action is taken in view of the amendment filed 7/6/04.

Drawings

2. Examiner acknowledges replacement sheets of drawings depicting figures 1 and 2A as "(Prior Art)". These changes are approved.

Claim Rejections - 35 USC § 103

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claim 24 is rejected under 35 U.S.C. 103(a) as being unpatentable over Flynn et al. in view of applicant's admitted prior art.

Flynn et al. teaches a lubricant that comprises a perfluoropolyether material and a halogenated sulfur material, in column 3, lines 32-56. Specifically the end groups of the lubricant as claimed can contain sulfur along with fluorine (a halogen material). Flynn et al. does not specifically state to use this material for a disk drive, however does teach (column 1, lines 5-10) to use this material in the lubrication of magnetic media. Magnetic media covers such media such as magnetic disks and magnetic tapes. Magnetic disks are well known to be used in magnetic disk drive arrangements as taught by Applicant's admitted prior art as discussed on pages 1-2 of applicants written specification, specifically patents ('913, '899 and '487). As discussed, it is well known that lubricants be applied to a disk surface while in a volatile state, i.e. volatile lubricants. It would have been obvious to one of ordinary skill in the art at the time of the invention to use a lubricant for a variety of magnetic media as taught by Flynn et al. and

Art Unit: 2651

to apply such lubricants in a volatile state as taught by applicants admitted prior art in order to provide an information storage medium with a dense film of lubricant.

Allowable Subject Matter

5. Claims 1-23 and 25-39 are allowed.

Response to Arguments

6. Applicant's arguments filed 7/6/04 have been fully considered but they are not persuasive.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

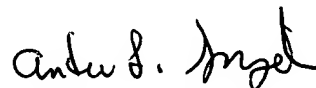

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
